Jennifer, Chris and Lisa -

You all did a fabulous job with the meeting. Much of the information informed conversation at meetings later in the week for me - especially our nutrients and resilience work. The PFAS update will help tremendously for next week's New England workshop.

Thank you!!!!

Dear New England States and EPA Region 1,

It was great seeing everyone this past week in Narragansett! On behalf of US EPA's Office of Research and Development (ORD), thank you for taking the time out of your busy schedules to visit ORD's Atlantic

Ecology Division. We were so glad that you were able to learn about EPA's research, meet our scientists and see first-hand some of the innovative work being done by EPA ORD researchers. We appreciated having the opportunity to share and collaborate with all of you.

It is very helpful for us to hear more about the environmental issues the New England states are confronting and receive feedback on how ORD's research, tools and methods can more effectively support states' efforts to protect the environment. We hope you found the research presented this week useful and relevant. We look forward to continuing our dialogue and sharing more of our applied science tools with you to help inform environmental decision making.

Attached are the presentations from Tuesday. We are compiling notes from the meeting and will share action items with you soon. We look forward to continued discussions with you and your staff. Please feel free to contact Lisa Matthews, ORD's State Liaison (matthews.lisa@epa.gov<<mailto:matthews.lisa@epa.gov>> or 202-577-4035) with any questions or follow-up.

Sincerely,

Chris Robbins

Christopher S. Robbins

Deputy Assistant Administrator for Management (Acting)

US EPA Office of Research and Development
